

TRICORONA

PRESS RELEASE 25 SEPTEMBER 2008

Tricorona and Sustainia partner to provide climate services

Sustainia, a Swedish sustainability consultancy, and Tricorona, a global leader in carbon offsetting, announced today a new partnership under which they will provide packaged climate services to their global customer base.

“Our core business is helping our customers manage their sustainability issues from a strategic perspective,” says Inga Birath von Sydow, CEO Sustainia, “and climate and other environmental issues are a central element. Our partnership with Tricorona means that we can now offer our customers comprehensive carbon management services, including climate audits, climate strategies and carbon offsetting.”

Climate audits quantify an organisation’s climate impact, according to international standards, allowing benchmarking and cross-comparisons, while climate strategies help organisations to reduce their climate impact. Carbon offsetting of the remaining emissions is based on UN-certified climate projects within the Clean Development Mechanism (CDM) of the Kyoto Protocol. Because the projects are based on renewable energy production, they make a long term contribution to reducing the world’s dependence on fossil fuels.

“Carbon offsetting is just one part of a comprehensive climate strategy, where the primary goal is reducing your emissions, and through our partnership with Sustainia, we can now offer our services to a wider customer base,” says Per Egstam, head of climate services within Tricorona. “Because all of our climate projects are certified under the Kyoto Protocol, their quality is consistently high and they fulfil offsetting guidelines from government bodies such as DEFRA in the UK and the Swedish Energy Agency.”

For more information, contact Per Egstam, Tricorona, on +46-8-506 88 599 or Inga Birath von Sydow, Sustainia, on +46-8-442 9790.

Tricorona invests in and trades environment-related securities.

The company has been quoted on the Stockholm Stock Exchange since 1989 and on the Nordic Exchange since 2006.
